

KCER - Kidney Community Emergency Response Coalition

Under the direction of CMS, the End-Stage Renal Disease (ESRD) Network Program consists of a national network of 18 ESRD Networks, responsible for each U.S. state, territory, and the District of Columbia. ESRD Networks service geographic areas based on the number and concentration of ESRD beneficiaries.

For any type of emergency or disaster, ESRD Networks are required to facilitate and assist providers/facilities in developing plans for local emergencies/disasters.

In the event of local disasters, the Network will track availability of services and assist patients in identifying dialysis facilities that can provide ESRD services. The Networks shall also track and make available to the public the open and closed status of the facilities in the effected area. In addition, as directed by CMS, the Network shall provide information to family members and treating facilities on where a patient previously/currently is receiving services to assist in location of individuals and the exchange of critical medical information.

As necessary, Networks shall participate in national and/or regional calls with providers, emergency workers, and other essential persons to ensure coordination and that the needs of individuals with ESRD are being met. As appropriate, Networks shall coordinate activities with providers and other emergency workers to ensure access to dialysis.
